

FEHU LAB

10 Free AI Prompts for Etsy Sellers

Titles, tags, descriptions, Pinterest copy and niche mining — a working sampler of the full 60-prompt pack, built from our own shop's pipeline with real example outputs from that shop.

FREE - v1.0 — 2026-08

\$0 forever. Quarterly refreshes planned alongside the full pack.

10 copy-paste prompts - 2 from each core chapter

Fill-in-the-blank [SLOT] fields, tested outputs

US Letter PDF - instant download

What 'tested' means here: every prompt was built from our own shop's working pipeline; the example outputs are real listings from that shop. No income promises. AI assistance disclosed.
Lab revenue to date: honestly \$0.00.

How to use this sampler

Ten prompts from the full pack, chosen to be useful the day they land: two from each of the first five chapters. Same three steps as the full pack.

1 Pick the prompt that matches today's task

Titles, tags, descriptions, Pinterest pins, niche decisions — two prompts each. Copy the prompt into your AI tool and fill every [SLOT] with your real product facts. Thin facts in, [SLOTS] out — the prompts will not invent numbers for you.

2 Run it, then edit like a drafter

The prompt supplies structure and the hard constraints (140-character titles with the keyword in the first 40, 13 tags at max 20 characters, 7 KDP fields at max 50). You supply judgment. The example under each prompt is a real output from our own shop, so the standard is visible.

3 Ship it under the honesty floor

Keep your AI-disclosure line in every listing (Etsy Creativity Standards, updated 2025-06-10: disclose AI use, list as 'Designed by a seller'). No income promises, no fake scarcity, no invented numbers — the same floor the full pack stands on.

What 'tested' means here

Every prompt in this sampler was exercised against the lab's own running pipeline, and each example output is a real artifact from that pipeline — an actual Etsy title, tag set, KDP keyword set or pin from the lab's live listing kits, cited to its source file. What we do not claim: revenue. The lab's ledger honestly reads \$0.00 today, so these prompts prove craft and process — they do not promise sales outcomes.

Contents

10 prompts in 5 chapters. Each card stands alone — jump to whatever today's task is.

1 Listing Titles

The 40-Char Keyword-First Title · The 140-Char Title Audit

2 Tags & Keywords

The 13-Tag Mixer · The KDP 7-Keyword Builder

3 Descriptions

The Full Description Skeleton · The AI Disclosure Phrasing Pack

4 Pinterest Copy

The Pin Title Formula · The Two-Sentence Pin Description

5 Niche Mining

The Should-I-Enter Verdict · The Honest Band Pricer

CHAPTER 1

Listing Titles

Etsy's algorithm weights the first 40 characters of a title most, and the cap is 140. These prompts encode the exact formula the lab's listing factory enforces: primary long-tail keyword first, then modifier chains, with a curated-override pass for anything that runs long.

IN THIS CHAPTER

- 1.1** The 40-Char Keyword-First Title
- 1.4** The 140-Char Title Audit

1.1 The 40-Char Keyword-First Title

USE WHEN You are titling a brand-new listing from scratch.

Act as an Etsy SEO specialist. My product is **[PRODUCT]** and my primary long-tail keyword is **[PRIMARY KEYWORD]**. Write 5 title candidates under 140 characters each. Rules: lead with the exact phrase **[PRIMARY KEYWORD]** so it sits fully inside the first 40 characters; then add modifier chains in this order – contents, subjects or style, audience or use-case, format. Separate phrases with commas, one colon max, no clickbait words, no ALL-CAPS words. After each candidate print its character count and confirm the primary keyword's end position is at or under 40.

TESTED OUTPUT — FROM OUR OWN SHOP

Geometric Animals Coloring Book: 30 Printable Pages, Low Poly Fox, Wolf, Owl & Bear, Facet Line Art, US Letter PDF (114 chars — primary keyword 'Geometric Animals Coloring Book' ends at position 33, then modifier chains: contents, subjects, style, format.)

Source: `ventures/listings/src/generate.py` — curated Etsy title for `geometric-animals-coloring-pack`

1.4 The 140-Char Title Audit

USE WHEN You have a draft title and need it checked against the cap and the 40-char rule.

Act as a strict Etsy listing auditor. Here is my draft title: **[DRAFT TITLE]**. Do four things: (1) print its exact character count and how many characters I am over or under the 140 cap; (2) print the first 40 characters and tell me whether my primary keyword **[PRIMARY KEYWORD]** sits fully inside them; (3) flag any filler words, repeated words, or phrases a buyer would never search; (4) if it fails any check, rewrite it – shorten, do not rewrite from scratch: cut filler first, then the weakest modifiers, keep the primary keyword untouched. Show the new count.

TESTED OUTPUT — FROM OUR OWN SHOP

Celestial source title ran 160 chars — over the cap. The lab's audit cut 'Orbits &' and 'Instant Download' and swapped the em-dash for a colon: 'Celestial Coloring Book: 30 Printable Pages, Moon Phases, Constellations, Crescent Moons & Starburst Line Art, US Letter PDF' (124 chars). Shortened, not rewritten — and the kit flags the change for the owner to compare.

Source: `ventures/celestial-coloring-pack/listing_copy.md`; override in `ventures/listings/src/generate.py`

CHAPTER 2

Tags & Keywords

Etsy gives you exactly 13 tags, each max 20 characters; KDP gives you 7 backend keyword fields, each max 50. The lab's factory asserts both at generation time. These prompts build tag sets the way the lab does: 2-3 word combos of title words, head plus long-tail plus occasion, every length checked.

IN THIS CHAPTER

2.1 The 13-Tag Mixer

2.7 The KDP 7-Keyword Builder

2.1 The 13-Tag Mixer

USE WHEN You need a complete, balanced 13-tag set for a new listing.

Act as an Etsy tag strategist. My product is **[PRODUCT]** and my title is **[TITLE]**. Build exactly 13 tags with this mix: 3-4 head tags (the obvious 2-word searches), 5-6 long-tail tags (3-word specifics from my title's modifier chains), 2-3 occasion or audience tags, and exactly 1 format tag ('instant download' or file type). Hard rule: every tag max 20 characters – print each tag with its character count and re-do any that overflow. No single-word tags, no repeated words across more than 3 tags, no tags for things the product does not contain.

TESTED OUTPUT — FROM OUR OWN SHOP

The lab's bundle set: 'coloring pages pdf' (18); 'animal coloring' (15); 'printable coloring' (18); 'adult coloring book' (19); 'kids coloring book' (18); 'cat coloring pages' (18) ... 'instant download' (16). All 13 pass max-20; head, long-tail and format all present.

Source: ventures/complete-collection-bundle/listing_copy.md — the real 13-tag set

2.7 The KDP 7-Keyword Builder

USE WHEN You are cross-listing on KDP and need the 7 backend keyword fields.

Act as a KDP metadata specialist. Here are my 13 Etsy tags: **[TAG LIST]**. Build my 7 KDP backend keyword fields using the pairing method: field *i* combines tags (2*i*) and (2*i*+1) from the list, wrapping around; if a pair exceeds 50 characters, use the single first tag instead. Print each field with its character count and PASS/FAIL against 50. Then give me 3 alternative hand-picked pairs that mix a head tag with a long-tail tag for better coverage. No commas needed in KDP fields; do not repeat the book title's exact words if KDP already indexes them.

TESTED OUTPUT — FROM OUR OWN SHOP

The lab's real pairing output for the bundle: 'coloring pages pdf animal coloring', 'printable coloring adult coloring book', 'kids coloring book cat coloring pages', 'ocean coloring pages bold and easy' ... 7 fields, every one under 50 chars — asserted by the same factory that aborts on violation.

Source: ventures/listings/src/generate.py — kdp_keywords() run on the bundle's real 13 tags

CHAPTER 3

Descriptions

The lab's description structure is fixed and honest: hook, what's inside, the math, you get, good for, disclosure, license. No income promises, no fake scarcity, real numbers only.

These prompts draft each block and keep the whole thing compliant.

IN THIS CHAPTER

3.2 The Full Description Skeleton

3.5 The AI Disclosure Phrasing Pack

3.2 The Full Description Skeleton

USE WHEN You are writing a listing description from a blank page.

Act as an Etsy description writer. My product is **[PRODUCT]**; here are my facts: **[FACTS – contents, counts, sizes, file types, who it is for]**. Draft the full description in this exact block order: (1) one-sentence hook that names what it is and who it serves; (2) 'Inside:' – the itemized contents with real counts; (3) the honest math or value framing with real numbers only; (4) 'You get' – the exact deliverables (files, pages, sizes); (5) 'Good for' – 3 audience bullets; (6) the AI-disclosure paragraph (I will paste mine or you draft one to the Etsy Creativity Standards pattern); (7) license line. No income promises, no scarcity timers, no invented numbers – leave **[SLOTS]** for any fact I did not give you instead of inventing it.

TESTED OUTPUT — FROM OUR OWN SHOP

The lab's bundle description runs exactly this skeleton: hook ('The Complete Collection is exactly what the name says'), Inside (11 books with page ranges), The honest math, You get, Good for, AI disclosure, License — personal use.

Source: ventures/complete-collection-bundle/listing_copy.md — the Description section's block order

3.5 The AI Disclosure Phrasing Pack

USE WHEN You need a compliant, human-sounding AI disclosure for an Etsy or KDP listing.

Act as a marketplace-compliance copywriter. My product is **[PRODUCT]** and the AI did **[WHAT AI DID – drafting, art generation, data analysis]** under my **[HUMAN ROLE – direction, editing, curation]**. Write 3 disclosure variants: (1) two sentences for a description footer; (2) one sentence for a short blurb; (3) a fuller paragraph naming the verification I did. Each must: name the AI assistance plainly, name my human role, and avoid both overclaiming ('100% hand-made') and self-undermining ('just AI-generated'). Note for me where Etsy expects this: the disclosure line in the description, plus listing as 'Designed by a seller' per the Creativity Standards updated 2025-06-10.

TESTED OUTPUT — FROM OUR OWN SHOP

This product was created with AI-assisted generative design tools (procedural geometry rendered to vector line art) under the seller's creative direction, and is disclosed as such in accordance with Etsy's Creativity Standards. Each page was programmatically verified and visually reviewed before listing.

Source: ventures/complete-collection-bundle/listing_copy.md — the lab's live disclosure paragraph

CHAPTER 4

Pinterest Copy

Pinterest is the lab's documented highest-leverage channel for a zero-audience shop: it ignores your Etsy sales history and feeds the algorithm. These prompts produce pin titles, descriptions, alt-text and launch calendars in the exact shapes the lab's own launch kit uses.

IN THIS CHAPTER

- 4.1** The Pin Title Formula
- 4.2** The Two-Sentence Pin Description

4.1 The Pin Title Formula

USE WHEN You need pin titles that carry search keywords in under 100 characters.

Act as a Pinterest search copywriter. My product is **[PRODUCT]** and my primary keyword is **[PRIMARY KEYWORD]**. Write 5 pin titles under 100 characters each. Rules: the keyword or its tightest variant leads; add one concrete differentiator (a count, a format, an audience); no clickbait, no ALL-CAPS, no hashtags in the title. Print each with its character count. Give me the 2 strongest for a 2-pin split on the same product image.

TESTED OUTPUT — FROM OUR OWN SHOP

Real pin titles from the lab's launch kit: 'Bold and Easy Coloring Pages — 30 Thick-Line Designs' (52 chars); 'Cat Coloring Pages — 30 Printable Designs' (41 chars); '330 Printable Coloring Pages — 11 Books in 1' (44 chars).

Source: ventures/pinterest-launch-kit/pins.csv — pin-07, pin-09, pin-04 title fields

4.2 The Two-Sentence Pin Description

USE WHEN Your pin has an image and a title but a blank description.

Act as a Pinterest copywriter. My product is **[PRODUCT]**, my keywords are **[KEYWORDS]**, and the pin links to **[DESTINATION]**. Write the pin description as exactly 2 sentences: sentence 1 front-loads the primary keyword and says what the thing is with real counts; sentence 2 covers format and the instant-download or use detail. Max 500 characters total, no hashtags, no emojis, no price claims. Then write a 1-sentence variant under 150 characters for crowded boards.

TESTED OUTPUT — FROM OUR OWN SHOP

'3 free printable coloring pages (US Letter PDF) — a bold-easy bear, a rune mandala, and a seed-of-life geometry. Instant download, print at home.' — keyword 'free printable coloring pages' inside the first 6 words, real count (3 pages), formats (US Letter PDF, instant download).

Source: ventures/pinterest-launch-kit/pins.csv — pin-01 description field, verbatim

CHAPTER 5

Niche Mining

The lab's niche framework is three numbers and an honest verdict: demand vs listings vs difficulty, with trend direction and a proof product as tie-breakers. These prompts run that framework on any niche you are considering — including the uncomfortable 'do not enter' outcomes.

IN THIS CHAPTER

5.4 The Should-I-Enter Verdict

5.7 The Honest Band Pricer

5.4 The Should-I-Enter Verdict

USE WHEN You are at the go/no-go point on a new niche.

Act as a brutally honest niche jury. My candidate is [NICHE]. Here is my evidence: demand [SEARCHES/MO], supply [LISTING COUNT], difficulty [SCORE], 12-month trend [TREND], proof products [PROOF – listings with visible review counts], and my capability fit [FIT]. Weigh them: demand times supply-thinness times fit, discounted by decaying trend. Then deliver one of three verdicts – ENTER, ENTER DIFFERENTIATED, or SKIP – with the two strongest reasons and the one risk that would sink me. Close with the mandatory caveat: demand is not revenue; no sales are guaranteed. If my evidence has gaps, list exactly what to go measure before deciding.

TESTED OUTPUT — FROM OUR OWN SHOP

A real ENTER DIFFERENTIATED from the lab's scan: ADHD printables — niche +22% YoY, proof product is a \$15.99 printable bundle with 7,461 reviews (exactly the lab's format), but difficulty 44 — so the lab entered with time-blindness-specific design, not a generic planner.

Source: research/marketplace-demand-2026.md section 5 row 3; ventures/adhd-planner-printable-pack/manifest.json

5.7 The Honest Band Pricer

USE WHEN You need a defensible price inside the market's real band.

Act as a pricing analyst. My product is [PRODUCT] in [NICHE]; the niche price range is [RANGE] with median [MEDIAN]; my differentiation is [EDGE – page count, format, specificity]. Price me: start at the median, adjust up only for verifiable edges (state each), never price below the band floor to 'win' – at digital margins the fee stack eats the difference and cheapness is not the lever, findability is. Give me the recommended price, the launch-sale option (a visible strikethrough for the first 30 days is documented velocity practice), and the one-line justification I can paste into my listing notes. No revenue projections.

TESTED OUTPUT — FROM OUR OWN SHOP

Gumroad prompt-pack evidence: profession-specific packs justify \$27-47 vs \$5-9 generic; the validated ladder is \$0 lead magnet -> \$19-29 core -> \$39-79 bundle. This pack's own draft price, \$24, sits mid-band.

Source: research/marketplace-demand-2026.md sections 1C row 15 and 2; first-dollar-reality-2026.md 2c

Want the other 50?

The full pack

This sampler holds 10 of the 60 prompts — two from each of the first five chapters. The full pack adds a sixth chapter (Shop Ops: review replies, announcements, policies, refresh rituals, disclosure sweeps, customer messages) and 50 more prompts across titles, tags, descriptions, Pinterest and niche mining — same card format, same real tested outputs.

An honest pointer

No countdown timers and no fake scarcity — the full pack will be there when you decide. If these 10 prompts saved you real time, the other 50 are the same craft at six times the depth: look for '60 Tested AI Prompts for Etsy Digital-Product Sellers' wherever you picked up this sampler. If they did not save you time, keep the free ones with our thanks.

Why free?

Every \$0 checkout delivers this file by email — that is the whole funnel, honestly stated: free sampler first, full pack if it earns it. You will only hear from the shop when something real launches or refreshes.

AI disclosure & the honesty floor

This sampler was created with AI-assisted research, drafting and layout tooling under the lab's creative direction, disclosed per Etsy's Creativity Standards (updated 2025-06-10). No income promises. The lab's revenue to date is honestly \$0.00.
